

Kew Psychological Services

and

Camberwell Psychological Services

Our psychologists are highly experienced and are registered with the Psychology Board of Australia and are members of the Australian Psychological Society.

APS Psychologists: Good thinking

Consulting an APS Psychologist ensures you receive the highest standard of quality, expert psychological assessment, diagnosis, treatment and care. Among others, therapeutic approaches include cognitive behavioural, positive psychology and solution focussed therapies.

Our psychologists are registered as approved treatment providers with **Comcare** and **Workcover** and with an appropriate mental health care plan (referral) from their doctor, patients can receive a fee rebate from **Medicare**.

Ask your general practitioner about eligibility for a **Mental Health Care Plan** allowing rebates from Medicare. However, a referral from a medical practitioner is not a requirement for our services.

NOTE: With your permission and informed consent, in certain circumstances our psychologists may be required to communicate with your general practitioner or other health professionals involved in your care.
